ε Composing the bathroom environment means weaving relationships between intimacy, silence, the interior value of a place and forms, materials, lights and colors. In an infinity of possible combinations. To make these expressions unique GSI has enriched its family of products with Color Elements. Seductively physical and with a distinctive character, our new mat finishings are designed to accompany select supported washbasins from our Sand line, as well as semi built-in washbasins and two pairs of suspended Pura wc/bidets. The collection runs over a chromatic range of 6 different shades of opaque color that are harmoniously compatible and can even be combined with each other. Colors that for us at GSI are: natural, Italian, emotional.

PICK UP

With Stefano's knowledge of plants and keen eye for design he found a natural beauty in a lichen and started to consider ways of applying the two into a meaningful system that could be incorporated within either domestic or commercial space. In 2009 VERDE PROFILO® discovered a way of preserving the natural lichen using a 100% ecological application which would allow the lichen to be placed onto a base allowing it to be fixed to walls and it was this invention that led to the patent of MOSSwall®.

MOSSwall® has many unique features but perhaps the most important is that it requires no maintenance and is the ultimate synergy of nature and design.

Handmade in Italy and shipped globally; MOSSwall® is the world leader in this type of material application. However MOSSwall® is not simply a beautiful product it also has an important function, by natural default of the lichen it is certified for acoustically absorbent. In real terms this means that area's suffering from high levels of reverberation or echo, can be efficiently controlled through the use of MOSSwall®.

MossWall® is created from a natural lichen that is used for indoor use. After harvesting, from sustainable sources, the MOSSwall® is stabilized and undergoes anti-static treatment to avoid the capture of dust.
